

ABHISHEK TIWARY

SOFTWARE ENGINEER · APPLIED AI / AUTOMATION

Bengaluru, India · +91 8340336634
abhishektiwary2077@gmail.com
[Linkedin](#) [GitHub](#) [Portfolio](#) [Demos](#)

PROFILE Software engineer building applied AI, automation, and developer tooling across revenue workflows, real-time voice systems, local-first development tools, and data pipelines. Focused on reliable integrations, testable workflows, clear system boundaries, and deployable product engineering.

SELECTED PROJECTS 04 BUILDS · DEMOS · SOURCE

- 01

RevenueOS — Revenue Operations & CRM Automation
Python · FastAPI · PostgreSQL · Redis · Next.js · Celery
2026 - Present
[Demo](#) / [GitHub](#)
 - Built a multi-tenant revenue platform spanning leads, opportunities, communications, appointments, payments, automation, and analytics.
 - Enforced tenant isolation in repository queries and PostgreSQL row-level security; provider integrations fail closed when configuration or credentials are absent.
 - Structured the backend around API, application, domain, and infrastructure boundaries with real-PostgreSQL integration tests and observable worker flows.
- 02

Viberant — Local AI Development Workspace
JavaScript · Node.js · Local-first · Git/GitHub · Tool launchers
2026 - Present
[Demo](#) / [GitHub](#)
 - Built a zero-install local workspace that discovers projects and opens installed AI coding tools, terminals, and editors already scoped to the selected folder.
 - Designed account-profile switching and one-press GitHub save/push with explicit offline and failure states so local work is never falsely reported as uploaded.
- 03

ReceptionFlow — AI Voice Receptionist
Node.js · WebSockets · Exotel · Sarvam · OpenAI / Anthropic
2026 - Present
[Demo](#) / [GitHub](#)
 - Built a config-driven receptionist that answers from approved business knowledge, captures callbacks, routes or escalates calls, and supports Hindi-English code switching.
 - Engineered a provider-neutral real-time voice path with barge-in, adaptive VAD, mock-call simulation, diagnostics, and one-JSON onboarding for new businesses.
- 04

VisionExtract — Article Image Extraction Pipeline
Python · Trafilatura · Newspaper3k · BeautifulSoup · Streamlit
2025 - Present
[Demo](#) / [GitHub](#)
 - Rebuilt article-image extraction as a reusable pipeline with a Trafilatura → Newspaper3k → BeautifulSoup fallback chain, relevance scoring, and aggressive asset filtering.
 - Processed 10K+ articles at ~93% precision with CLI quality controls, a Streamlit review UI, and HTML/JSON run reports for downstream workflows.

EDUCATION	TECHNICAL ACTIVITY
Ramaiah Institute of Technology, Bengaluru 2022 - 2026 Bachelor of Engineering in Artificial Intelligence & Machine Learning	Reverse Engineering & Windows Systems Research ~3 years Memory inspection, pointer/offset tracing, runtime debugging, process/module analysis, overlay/telemetry experimentation, and technical support for ~70–100 users across setup, compatibility, and runtime troubleshooting.

TECHNICAL SKILLS

LANGUAGES	Python · JavaScript · TypeScript · C++ · C	FRONTEND / APP	React · HTML · CSS · SCSS · Electron
AI / ML	LLM APIs · NumPy · Pandas · Scikit-learn · TensorFlow · OpenCV · Hugging Face	DATA / DEVOPS	MongoDB · SQL · AWS · Docker · Git · GitHub Actions · Vercel
BACKEND / APIS	Node.js · Express.js · Flask · REST · WebSockets	CS FUNDAMENTALS	DSA · DBMS · Operating Systems · Computer Networks
